

Kiran Kumar C

Software Engineer

A multi-faceted professional accustomed with proven technical; targeting Automation testing opportunities in Software Engineering with an organization of high repute.

Experience:

2019 - Current
Software Engineer
Libre Wireless Technology

I helped on defining a new software development process where quality is in mind since the definition of the software requirements until the moment it is running in production.

- Some of the activities I performed as a QA engineer
- Involved in Mobile GUI Manual Testing in the initial stages and Web applications
- Writing automated graphical user interface functional tests and for regression testing for mobile applications using Appium for Android and IOS platforms.
- Involved in GUI automation for Web Applications using selenium
- Writing automated acceptance tests using Cucumber.
- Writing automated visual regression tests
- Defining and tuning continuous integration and continuous delivery/deployment pipelines
- Code reviews
- Extending the application to add test ability into it
- Knowledge sharing sessions
- Actively participating in software architecture meetings
- Actively participating in scrum meetings
- Debugging and fixing bugs
- Refactoring code
- Creating and managing CI Jenkins Jobs for Scheduling / Nightly Run.

Tools Used: Java, Jenkins, Selenium, Appium, TestNG, Cucumber, Maven, Eclipse,
